DORA

What's your **bottleneck?**

Lead Time for Changes is one of the four key software delivery metrics which DORA has found to predict organizational success and employee well-being. What is your team's biggest challenge when it comes to delivering value to users?

Commit to local, remote branch,
or *draft* change proposal

Idea | Prioritization | Feature Design | Tech Design | Coding

first commit

Request review on
change proposal

Change proposal is approved

Code is deployed to one or more end users
(but may not be activated)

| Code Review | Pre-submit testing | Post-submit testing | Initial deploy | 1st User |

includes build and deploy to test infra · includes build and deploy to pre-prod infra · includes build and deployment to the first end user

Lead time from change proposal to release

| Roll-out | Feature activation |

ramp up from first end user to all end users · e.g. flipping a flag
